Pool Base Mixing Instructions

1. Mix approximately 25-26 gallons of water with one (1) bag of portland cement into a paddle type mixer. When applying mix to steeper sections of hopper, it may be necessary to use less water to stiffen the mix to prevent slipping. Also use less water on extremely humid days.
2. Next add two (2) bags of Whittemore Pool Base Aggregate.
3. Continue to rotate the mixer. From this point, 10-15 seconds is the ideal mix time required to achieve the best consistency. If necessary, continue for up to 60 seconds to achieve a workable consistency.

DO NOT OVERMIX.

OVER MIXING CAN CAUSE BREAKUP OF VERMICULITE PARTICLES AND DECREASE THE YIELD.

Pool Base Coverage Chart

BASED ON 2" THICKNESS

16' x 32'	30-35 bags
18' x 36'	40-45 bags
20' x 40'	45-50 bags
